## Manufacturer Recommendations

### **Hanamint Furniture Company**

**WARNING:** Water allowed to accumulate inside the frames and then exposed to freezing temperatures can cause damage to the frames. Such damage is not covered under warranty.

**Maintenance:** The best way to maintain the beauty of your furniture is to store them in a dry area out of extreme temperatures or severe weather.

### **Patio Renaissance**

**Product Care:** In cold weather environments it is best to move your furniture inside during the winter months.

### **Fabric Sling Furniture**

**Product Care/Winter storage:** If you live in an area that experiences freezing conditions, store your clean and dry outdoor furniture right side up in a dry, protected place. Water can collect and/or condense inside the frame tubing - if exposed to freezing temperatures, this water could freeze causing the frame tubing to crack or burst. This damage is NOT covered under your warranty.
