

How to Open the Umbrella

EASY ^{Lift} OPEN

1. Grasp lift controller arm and lift out away from main frame.
2. Extend lift controller arm up. As arm extends up, the canopy arm will extend outward and open the canopy
3. Push controller arm toward the canopy until locking mechanism secures canopy in the open position.
4. To close umbrella, reverse the procedure.

How to Tilt the Umbrella

1. To tilt the umbrella to the right, simply rotate the tilt wheel in a clockwise direction.
2. To tilt the umbrella to the left, simply rotate the tilt wheel in a counter clockwise direction.

Note: Umbrella must be in non-tilted position to close. Closing while tilted will damage the umbrella.

Cantilever Umbrella

USER MANUAL

Cantilever Umbrella Assembly Instructions

Caution: This umbrella requires a two person assembly. Caution should be used when moving or assembling this umbrella.

Umbrella should never be left in the "open" position while not in use. Lower and secure umbrella in windy conditions.

Step 1. Open Cartons: base and umbrella ship in two cartons.

Umbrella Carton

Base Carton

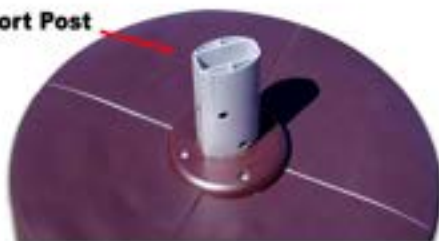

Step 2. Remove Shell / Fill Base: Pour sand or gravel into base. Base will hold up to (2) 50 lb. bags of sand / gravel. **DO NOT USE WATER TO FILL BASE.** Once filled, place resin shell back on to the base.

Fill Base Completely With Gravel

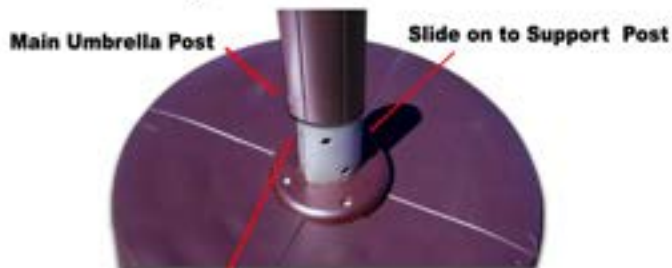

Step 3. Install Support Post: Use provided screws to secure the main pole support post on to the base. Make sure two holes are facing to the rear so main pole can attach to support post.

Support Post

Step 4. Attach Main Pole On To Support Post: Slide main umbrella pole over the support post with the two holes facing the rear of the umbrella.

Two Rear Facing Holes

Step 5. Secure Main Pole: Using the two screws and Hex Wrench provided, secure the main pole on to the support post at the lower rear of the main pole.

Secure Screws Here

Parts List

1. Umbrella Frame - 1
2. Support Post - 1
3. Umbrella Base - 1
4. Finial Top - 1
5. Support Post Screws - 4
6. Main Pole Support Screws - 2

Tools

1. Hex Wrench - 1

2. Ratchet (Controls Wheels) - 1

How To Operate Wheels

Step 1. Locate the Wheel Drive located at the rear of the base:

Step 2. To Engage Wheels: Using the supplied ratchet, turn the wheel drive counter-clockwise to engage the wheels. To retract wheels, reverse the direction of the ratchet. The umbrella should be in a closed position while the umbrella is being relocated.

Warranty

Galtech International warrants this product for a period of one year from original date of purchase. Damage as a result of wind or natural causes are not covered under warranty. Broken ribs are not warranted as that is indicative of wind damage. Sunbrella fabric is warranted against fading for a period of three years.

All warranty claims must be submitted to the dealer where the product was purchased. A copy of the original receipt is required to validate any warranty claim. All warranty claims are subject to factory discretion.

Note: The umbrella must be secured on a level surface. Secure umbrella shut with the canopy ties when umbrella is in the "closed" position. Wheels should be retracted while umbrella is in use.
